Question 1

Not yet answered

Marked out of 0.40

Flag question

The production function shows:

الفكرة
Production Function:
 $Q = F(L, K)$

يعني أقصى إنتاج ممكن من العمالة (L) ورأس المال (K).

- ☒ a. Highest output obtainable from given inputs
- ☐ b. Consumer equilibrium
- ☐ c. Government regulation
- ☐ d. Market demand

Clear my choice

Question 2

Not yet answered

Marked out of 0.40

Flag question

A technically efficient firm:

Technical Efficiency:**Same Inputs → Maximum Output**

- ☐ a. Avoids capital
- ☒ b. Produces maximum output from inputs
- ☐ c. Uses excessive resources
- ☐ d. Produces below capacity

Clear my choice

Question 3

Not yet answered

Marked out of 0.40

Flag question

Marginal product refers to:

- ☐ a. Additional input from one more unit of output
- ☒ b. Additional output from one more unit of input
- ☐ c. ratio of output with respect to cost
- ☐ d. ratio of output with respect to input

Clear my choice

مثال:
5 عمال = 100 وحدة
6 عمال = 120 وحدة
MP: $120 - 100$
 $= 20$

Question 4

Not yet answered

Marked out of 0.40

Flag question

A firm minimizes cost by:

يعني تختار خليط العمالة ورأس المال الأقل تكلفة.

- ☐ a. Ignoring input prices
- ☒ b. Choosing efficient combinations of inputs
- ☐ c. Maximizing labor only
- ☐ d. Reducing output to zero

Clear my choice

Question 8

Not yet answered

Marked out of 0.40

Flag question

Which input combination can produce the same output?

- ☒ a. Substitute inputs
- ☐ b. Complementary demand
- ☐ c. Inferior goods
- ☐ d. Public goods

Clear my choice

مثال:
عامل + آلة
ممكن تعوض واحد بالتاني.

Question 9

Not yet answered

Marked out of 0.40

Flag question

Diminishing marginal returns occur when:

يعني:
كل عامل جديد يضيف إنتاج أقل من العامل الذي قبله.

- ☐ a. Technology improves
- ☒ b. Additional output declines as more variable input is added
- ☐ c. Fixed costs rise
- ☐ d. Output rises at an increasing rate

Clear my choice

Quiz Part II

Quiz Part II

Status	Finished
Started	Sunday, 10 May 2026, 5:06 PM
Completed	Sunday, 10 May 2026, 5:13 PM
Duration	6 mins 54 secs
Grade	12.00 out of 12.00 (100%)

Question 1

Correct

Mark 0.40 out of 0.40

Flag question

The production function shows:

أهم 10 نقاط من الكويز

1. Production Function → Max Output
2. MP = Change in Output
3. Economic Cost = Explicit + Implicit
4. AFC decreases with output
5. Short Run = Fixed Inputs
6. Isoquant = Equal Output
7. Economies of Scale → AC falls
8. Perfect Competition:
MR = P
Demand perfectly elastic
- 9/ Monopoly:
MR < P
MC = MR
- 10/ If $P < AVC$ → Shut Down
